CHOICE OF THE EXPANSION TANK

The table simplifies the choice of the ELBI expansion tank to be installed in hot water systems. The selection of the tank can be effectuated starting from the system's total capacity or from the plant's power, taking into consideration an average content of 12 litres per 1000 Kcal/h of power.

FIXED-BLADDER FLAT EXPANSION TANKS, FOR BURNERS

(6 - 24 LITRES)

ERP Q

ERP 320

ERP 385

ERP RET

For non-drinking water

For heating systems

Characteristics:

- Working temperature: -10° / +90°C.
- Long lasting epoxy powder paint, red.
- SBR rubber bladder with characteristics to guarantee the best performance and long duration.

ERP 320 and ERP 385:
Articles supplied in packs of 4 pieces.

WARRANTY: 2 YEARS
